President Kerwin and the Board of Trustees:
Because it is unconscionable to pay for our education with investments that will condemn the planet to climate disaster, we, the undersigned students of American University, make the following demands of the Board of Trustees.

- First, hear from students representing the Fossil Free AU campaign at the November 15 meeting of the Board of Trustees.
- And second, to vote on a negative screen and full divestment at the February 21 Board meeting.

We believe such action on behalf of the University will not only be a sound decision for our institution's financial portfolio, but also for the wellbeing of its current and future graduating classes, who deserve the opportunity to graduate with a future not defined by climate chaos.
